A

Blood expression instruments
4,462 potentially druggable genes
2,544 genes with instruments
6,135 SNP–gene records

→

BBJ GD discovery
2,234 estimable genes
13 discoveries
Threshold $P < 0.05/2{,}544$

→

Comparison datasets
UKB hyperthyroidism, FinnGen GO
Post hoc: FinnGen GD,
FinnGen GO strict, GTEx tissues

Colocalization: 24 selected genes, centered on *TSHR* and *IGF1R*, with *CTLA4* as comparator
